## Winter Sewer Averaging BEGINS!

Your actual water usage during the months of November 2025 - February 2026 are reviewed to determine your sewer rate for your monthly bill. The lowest two months of metered water usage of those four are then averaged to determine your new sewer rate. These months are deliberately chosen because they tend to have the lowest consumption for most customers. The end result is that those who are conservative in their usage will pay less for sewer services. Those who use more water and place a greater burden on the treatment facilities will pay more. New winter averaging rates will be calculated in April of 2026 and due on your bills beginning in May 2026.

We will, however, continue accepting and providing smaller medical equipment in good condition, including manual wheelchairs, crutches, shower chairs, bedside commodes, and similar items.

Thank you again for your continued generosity and support throughout the years, we couldn't do this without you!
