The City will be utilizing the Alfalfa Property as the new Green Center. Relocating the Green Center to this property will be relatively inexpensive. However, staff is still evaluating the possibility of utilizing this property as a transfer station and/or emergency disposal facility in the event of a natural disaster. We are still trying to schedule a site visit to a recently built transfer station in Bastrop. This \$150,000 is being carried over from FY-23.		
As mentioned in FY-23's budget proposal, the \$1.5 million construction cost is a placeholder number and pure estimate. The actual cost will be unknown until the scope is identified and engineering plans are completed.

<p>This project was previously approved in FY-23's budget. RFP 23-06 was approved by City Council on July 20th, 2023 in the amount of \$638,000. Given how late in the Fiscal Year this RFP was approved, it estimated that only \$50,000 will be spent in FY-23. It is also estimated the remaining \$589,000 will have to be carried over into FY-24. All of the engineering costs have been expended this Fiscal Year, and none will be needed in FY-24.</p>

<p>As per Council's direction, this project is a place holder to see what the City's bonding capacity will be in the future. This cost was derived from the WTP #3 expansion listed in the Utility Rate Study. The total proposed cost in the rate study listed the cost as \$14.7 million. A cost escalation of \$4 million was added due to the unknowns, and to account for inflation. It is well known that an upgrade to water capacity at Plant #3 will be needed in the very near future. Once the water master plan/model is completed, staff will be in a better place to provide a more realistic estimate.</p>

<p>As part of our Effluent Disposal Permit the City isn't permitted to discharge Type 2 effluent into Lake Travis, and the City is also required to install a 3rd effluent storage pond in its system once the City reaches 0.75 MGD of wastewater. As many are well aware of, there is a leak in Effluent Pond 17's liner causing direct discharge of effluent into Lake Travis. To repair this liner, the City must build the 3rd effluent pond. Once this 3rd effluent pond is built, Lago Vista Golf Course will be able to install their own independent pump station for their irrigation system.</p> <p>As presented at the June 15, 2023 Council Meeting, the estimated construction cost for Pond #17's rehabilitation is \$2.2 million, and the estimated construction cost for Pond #2 is \$2.0 million. Freese & Nichols have provided a cost for engineering services which is \$438,000. Some of this project may be carried over into FY-25. These two projects will be bid at the same time, and after Pond #2 is complete, they will begin rehabbing Pond #17.</p> <p>These projects are ineligible for Impact Fee Funds.</p>

Project Details	
The Lago Vista Golf Course is absolutely essential to the City's effluent disposal process permitted by TCEQ. This irrigation system is in desperate need of repair, and well past its useful life. Currently, due to trash and debris that have collected in the lines over the course of 50 years, they are unable to irrigate the volume of effluent needed to keep up effluent production volumes. As a result, the conditions at the golf course have decreased dramatically, and a large burden is being placed on the Cedar Breaks Effluent Pond.	
Also, this irrigation system will include a new pump house on the new effluent pond being proposed on hole #2. This will completely separate Public Works & Golf Course operations. By doing this, the Golf Course Superintendant will no longer have to call Public Works Personnel to turn on/off any pumps. This upgraded irrigation system will allow for an increase in disposal volumes, and will greatly improve efficiency.

<p>Currently, the Wastewater Plant is operating at near 75% capacity. As per TCEQ, this is the threshold where they require an upgrade in capacity begin the design phase. As presented to the City Council at the June 15th, 2023 meeting, the estimated cost for an upgrade to 1.5 MGD (from 1.0 MGD) with Type 2 treatment is \$17.4 Million. These costs were based on Present Value of the Dollar, and did not include the Future Value. Also, this cost estimate included the engineering design. Typically, it will take a project of this magnitude about a year to complete design and permitting. Also, a good estimate of engineering design cost is about 10% of the total cost. It is being proposed that a total of \$1.74 Million be allocated in FY-24 for the design of this upgrade, and the remainder (\$15,660,000) of the cost be programmed for FY-25. Since inflation over the past several years has been higher than average, a cost escalation of 6% was applied to \$15,660,000 which is equal to \$16,599,600, which increases the cost of this project by \$1 Million.</p> <p>The design of this plant will include upgrades to certain elements which will allow for an increased treatment volume, and will also allow for a cheaper upgrade to Type 1 treatment if a future City Council desires to do so. This project is Impact Fee Eligible.</p>

<p>According to the TML Report produced on 6/13/23, they identified 4 safety items needing to be addressed at the Golf Course Club House. These items are the parking lot which is estimated at \$228,200, not having fire rated drywall above the cart barn which is estimated at \$22,750, various electrical repairs estimated at \$8,200, plus HVAC repairs estimated at \$16,000. The total estimated cost is \$275,200. The budgeted amount was increased to \$300,000 to account for any unknowns and cost increases for inflation. These safety items can be funded through a CO.</p>

The City of Lago Vista pool is about 20 years old and needs some repair work. Leaks around light fixtures were repaired and staff is hopeful these are the only leaks. The pool still needs to be replastered.
